

A Note to Our Customers

Some communities are experiencing water restrictions due to drought conditions across Alabama.

The Anniston Water Works Board wants you to know that we do not currently have any shortages. While using common sense with any natural resource is always wise, please continue your normal water use at this time.

If the drought begins to affect our water supply we will notify you. At the current time, however, we have more than adequate supplies to meet your needs.

Anniston Water and Sewer services are still among the lowest cost and highest quality in the nation. And we are proud to serve you.

We believe that communication with our customers is key to our mutual success. This information is being provided in response to customer inquiries regarding water conservation.

For more information on your water system please visit www.awwsb.org.
